

Ogle County Planning & Zoning Department

911 W. Pines Rd.
Oregon, IL 61061
(815) 732-1190
Fax: (815) 732-2229
www.oglecounty.org

Using Ogle County GIS Map Services

Go to the Ogle County website at www.oglecounty.org; click on the "GIS" tab;
At the site, choose the "Map Services" located in the in upper right corner. Review disclaimer and choose "yes".

At next screen, click on "Enter the Site"; choose "Illinois" and "Ogle" for state & county and then "Property Search";

At next screen, (should say "Beacon" at top) enter the 10 digit tax id number without dashes or enter address number only for a list of all addresses containing those numbers.

The next screen will be a summary of the property and allows you to verify that you have chosen the right parcel by verifying the acreage and/or address if there has been one assigned to the site. In the upper right corner, choose "Map" tab and an aerial photo of the parcel will appear with the parcel in question outlined in aqua.

To the right there is a column with two tabs "Layers" and "Legend". With the "Layer" tab open, click on box next to the word "Zoning", and a drop down menu will appear. Click on the box next to the word "County Zoning" and the parcel color will change color. If the color of the parcel is grey, that means the parcel is in an incorporated part of the county and you will need to contact that city or village for zoning information.

Click on the "Legend" column for a list of what zoning district each color represents. Compare the color of the parcel in question to determine the zoning.

To determine if the parcel is in the flood plain, turn off the "County Zoning" layer and click on the "FEMA Floodplain" box to turn that layer on.

If you require something in writing, fax the parcel number/address to the Zoning office at 815-732-2229. If you want to sign up for an account and be able to search by name, contact the GIS Department at 815-732-1153 or via email at gis@oglecounty.org.
