

Matrix for Type/Size of Solar within allowed areas and proximity to other types of zoning	Prime Farm Land			Non-prime Farmland			Unique Land - Special consideration (e.g. Park, Historic site, etc...)			Renewable Energy Zoning Sites (consider creating these)			Public facilities (e.g. schools, libraries, etc..)			Industrial or Heavy Commercial			General Commercial (e.g. restuarants, stores, businesses)			Rural Residential 100+acres			Rural Residential 10-100 acres			Residential (R1/R2- Single Family)			NOTES (setback to be determined by majority use of adjoining land using calculation below)

 Committee to agree/define on type/size descriptions required - these are just a "for example"	Majority use calculated by counting all unique partials adjoining proposed solar site. Each parcel counts one. Simple majority for type of zoning defines setback to be used																														
	NA- Not allowed																														
	P- Permitted use with permit																														
	S1 - Permitted SUP use (ground mounted only)																														
	x - Not applicable																														
TBD -to be agreed upon by committee in terms of feet of setback																															
 Committee to agree/define on appropriate notes - these are just a "for example"
